Hear Ye!

There is now available a beautiful boxed set of five CDs containing the entire collection of the Notes on EMP and Related Subjects. They come close to 2,000 papers. The set is current as of mid 2009.

These will make an excellent addition to university science/engineering libraries, where they can reside for posterity (future researchers, perhaps centuries from now).

If you wish to acquire this limited edition set, please send a check for \$50 (U.S. dollars), payable to "The University of New Mexico, ECE Dept." to my assistant at the following address:
