

HPE 2013

Lohas Park, South Korea

26th May to -1st June 2013

Recipe for a Limerick

5 line poem

Rhyme structure is AABBA

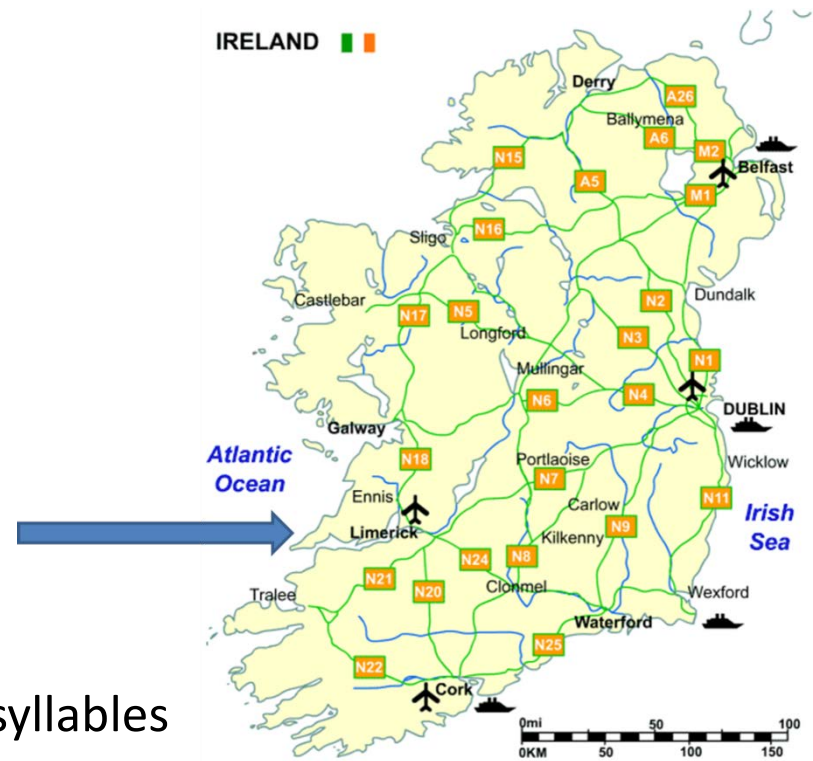

Lines 1,2 and 5 rhyme

Lines 3 & 4 rhyme with each other.

Lines 1, 2, and 5 generally have seven to ten syllables

Lines 3 and 4 have only five to seven syllables.

Ideally, it should be about a humorous or clever story/observation/statement, with the last line carrying the real "zinger" that makes it truly funny.

Entry 2013-01

Welcome

If answers EM, is what you seek,
Don't loose your paddle up the Creek,
In Lohas Park,
You'll find that spark,
Our SUMMA friends, create this week.

Howard Reader 27/05/2013

Entry 2013-02

Maxwell's considerations

High-Power Electromagnetic

So complex you can easily forget it

Try div, grad & curl

And the truth will unfurl

We promise that you won't regret it.

Richard Hoad, 28/05/2013

Entry 2013-03

Faculty gurus

When looking for gurus in EM
Seek out those who deliver the gem
Ask Baum, Giri, Gardner,
Hoad and Parmantier,
And don't forget to ask Kaelin

Howard Reader 27/05/2013

Entry 2013-04

Missile story

Talking to the Queen, UEMI came on the scene
A missile in flight is so mean
Exocet came out of the blue
Crashed into Sheffield, making it askew
Was sad, when the great ship went in the brine.

Dave Giri 28/05/2013

“U”: unintended

Entry 2013-05

Women's (EM) Liberation

An young Lady from Korea

An EMP expert in all of Asia

She joined the class in Lohas Park

But yet things were in the dark

When will she be free of HPEM mania

Dave Giri 28/05/2013

Entry 2013-06

The mission

With the whole Faculty, we went this time to Lohas park
The main difficulty; to extract EM from the dark.
This was the second time in Korea
We taught the whole HPE area
No way to feel guilty, if there is still a question mark

J-P 28/05/2013

Entry 2013-07

Maxwell, but no coffee

When people have good EM Shields
This is the point where EM yields
But if there is no coffee
People have to pay the fee
No mood caring for EM Fields

J-P 28/05/2013

Entry 2013-08

Eureka

Electromagnetics at Lohas Park
From early morning to the very dark
We break for Bar-Be-Q
Have some liters of Soju
Suddenly lightning ideas in a spark

Armin Kaelin 28/05/2013

Entry 2013-09

Korean Food

Korean food is quite hot and very nice

Today I had soup full of spice

Fish and pepper greens

Chili with green beans

I think I will reach for the ice

Richard Hoad 28/05/2013

Entry 2013-10

EMP Topology

To analyze the EMP interaction
J-P. introduces the B.L.T. equation
But one must take great care
Not missing each single wire
Or the old topology is in question

Hanwu YANG 29-05-2013

Entry 2013-11

Team working

We enjoy Lohas Park for a while
Talking about wavelengths less than a mile
We learn and exercise
Eat, drink and socialize
Next Saturday we like it Gangnam style

Armin 29/05/2013

Entry 2013-12

Learning

HPEM Principles and Theory

Famous books, some from Dave Giri

We listen and learn

The brain starts to burn

We stop for a photo and say “Kimcheeeee”!

Armin Kaelin 28/05/2013

Entry 2013-13

Wang-chang !

H P E bell driver came in Pyeong-Chang !
(Hand Power Emitting) or (Hardened Pulser Estimating)
(Horrible - Phobia Emersion)

We are triggered easily by the sound of the Bell like a hitting
Bong-Chang

Doing that make us so vulnerable ~~

This time I'm sleeping, not tolerable ~

Is there anybody transmit me, immune energy Wang-Chang
(much much more)!

Entry 2013-14

Carl's legacy

He was a **Singular Expansive Man**

I mean what we call a **SEM** fan

What a knowledge !

What an image !

Let's continue his education plan

J-P 29/05/2013

Entry 2013-15

Bell

No more no more, I can't stand this damned Bell,
As every day, this morning from bed I fell.
Oh my god it is seven !
How can it be so even ?
Melt right away, disappear or go to hell.

J-P 29/05/2013

Entry 2013-16

Story of family

After Snow

There still remains unmelted snow in a solitary village.

Who gladly knocks the door in my shabby cottage?

As night falls in silence,

The room is filled with fragrance.

I perceive that apricot flowers bloom no having leafage.

Entry 2013-17

No BLT !

Lohas park in PyungChang is problematic due to HPE201

Oh! There are so many problems every night

Here, CAD and BLT sandwich are solutions.

Armin gave me only CAD with BLT

So crazy ! Tonight made me problematic but will make me clear

Tae-Heon Jang 30/05/2013

Entry 2013-18

Big Bang

Big bang history, Electromagnetics
Don't forget to write your Limericks
From morning to late
Solve problems you hate
You will see, you will **get your kicks**

Armin Kaelin 30/05/2013

Entry 2013-19

Efficient shields

HEMP and lightning protection is not easy,
HPEM protection is even tricky.
Hard as I tried,
With Kaelin helping aside,
Still I cannot get the answer neatly.

Hanwu Yang, 30/05/2013

Entry 2013-20

Hot shots

Dr. Giri thinks EMP is scholarship

It influences serious effects to physical environment for human

And he want to make excellent student

Student want to enjoy their own life

No! EMP means Erotic Movement of natural Person

Taehyeon Yang, 30/05/2013

Entry 2013-21

In flight experiment

Today, we experienced flight conditions
For which aircraft have EM completion.
Hard not to have grounding,
But glad to have bonding.
For sure it was worth this exhibition !

JP 30/05/2013

Entry 2013-22
French connection

Tomorrow I will close my **armoire**
It is like I was inside a **film noir**
By the way, “**c’est la vie**”
I’ll drink some **eau de vie**
So it is time to think of “**au revoir**”

JP 31/05/2013

Entry 2013-23
Reach for the moon

Euroem Toulouse was the best of all

J-P. Parmantier was heard to call

The audience was stunned

And Giri punned

« I don't think so; you have some gall »

Howard Reader, 31/05/2013

Entry 2013-24
Little big French

Euroem était au dessus des autres
J-P. Parmantier was head to bluster
Tous ont été stupéfaits
Et Giri was heard to say
« Sounds like Bighorn and General Custer »

Howard Reader, 31/05/2013

Entry 2013-25

Book store

We are happy to learn about VHF UHF signal from the directed star ~

Numerous dishes are arrayed with different theta (θ), *Alang-ga-mola* ~

To find similarity, let's go over - hit the EMP Book (*review*)(*study*)
 (북 = drum)

Wanna buy a stick to *hit*?? Oh no, take a look!

Shield your mouth perfectly. And you can't say, "Done Dollar"
 (돈 달라 = give money)

Entry 2013-26

Wild forests

Singapore Hello Everyone here's a short limerick from Singapore!
So happy to meet experts from California to France, Onera!
This is the best conference we have attended by faaar!
All the way at Peongchang surburb!
This country side is superb!
For all the organizers' hard work, 감사합니다!

Juliana and Lester

Entry 2013-27

Before the show

Finally, Friday was coming

But group F was dying

Due to prepare for presentation

But we didn't know today was the last day of our connection

We will miss everyone, everything and bell ringing

Jong Won Yang, 31/05/2013

Entry 2013-28

Working too hard

If you're in a scare, and are in despair

Working all night your dare, until light becomes rare

Work al night with all your might

With students study you will delight

So have no fear Giri and his colleagues take care

Henri Vallon, 31/05/2013

Entry 2013-29

Kimchi safe

This is last day at Lohas Park

I hope we all got the HPM spark

Finally, I wont have to eat kimchi.

Why is Korean food so spicy?

But good times here will have definitely left a mark

Henri Vallon, 31/05/2013

Entry 2013-30
“Mira” Bell

Rain or Shine

My Bell is Fine

At the Midnight Stroke

The Liberty Bell Broke

Come Tomorrow, the Bell won't be Mine!

Dave Giri, 31/05/2013

Entry 2013-30

Soju side effects

We came to speeches of the nose.
J-P. junior is one of those.
Shielding is boring,
We prefer drinking !
Did I forget my mind, God knows.

Taehyeon Yang & Armin, 31/05/2013

Entry 2013-31

Cavemen

Our teaches great lectures gave.

We learned many ways to make microwaves.

They taught us about target effects

And shielding aspects

Its hard to hide in a cave !

Jennie Anderson, 31/05/2013

Entry 2013-32

DEW

Instead of the BLT, here's today's topic DEW; HPEM and Laser. Of course, we will discuss about HPEM without Leisure.

Make a good strip, not strip. Pay attention.

Think about the PN junction, not junction.

Wow, you – student - become to a monk, an EMP *Monster* !

Cheon Ho Kim 31/05/2013

Before the decision

A problem had to be solved...

Something to Ponder last night !

Loop of radius a (with a gap) - at a distance of d from a bar magnet

P1) Loop and Magnet are stationary – what happens?

P2) Magnet is moved from Right to Left at constant speed – what happens?

P3) Magnet is moved from Left to Right at constant speed – what happens?

Answer to question 1

Loop of radius a (with a gap) - at a distance of d from a bar magnet

Nothing of course !

P1) Loop and Magnet are stationary – what happens?

P2) Magnet is moved from Right to Left at constant speed – what happens?

P3) Magnet is moved from Left to Right at constant speed – what happens?

Answer to question 3

Loop of radius a (with a gap) - at a distance of d from a bar magnet

The loop remains alone !

P1) Loop and Magnet are stationary – what happens?

P2) Magnet is moved from Right to Left at constant speed – what happens?

P3) Magnet is moved from Left to Right at constant speed – what happens?

Answer to question 2

Loop of radius a (with a gap) - at a distance of d from a bar magnet

Scattering at the junction !

P1) Loop and Magnet are stationary – what happens?

P2) Magnet is moved from Right to Left at constant speed – what happens?

P3) Magnet is moved from Left to Right at constant speed – what happens?

And the winner of the HPE 2013
Limerick edition is ...

The big bang...

Bangsu Ryu !
